a survey of residuated lattices - chapman university - a survey of residuated lattices 3 table. in the last section we list open problems that we hope will stimulate further research. 2 basic results let be a residuated binary operation on a partially ordered set $hp; i$ with residuals **the structure of residuated lattices - vanderbilt university** - the structure of residuated lattices kevin blount and constantine tsinakis may 23, 2002 abstract a residuated lattice is an ordered algebraic structure $l = hl, \wedge, \vee, \cdot, e, \backslash, /$ such that hl, \wedge, \vee is a lattice, hl, \cdot, e is a monoid, and \backslash and $/$ are binary operations for which the equivalences **classes of residuated lattices - universitatea din craiova** - classes of residuated lattices lavinia corina ciungu abstract. the commutative residuated lattices were first introduced by m. ward and r.p. dilworth as generalization of ideal lattices of rings. non-commutative residuated lattices, called sometimes pseudo-residuated lattices, biresiduated lattices or generalized residuated **the structure of residuated lattices - digitalcommons@shu** - the structure of residuated lattices 439 algebras (that is, relatively complemented, distributive lattices with a greatest element). following the notational convention of [1], lg is the variety of all lattice-ordered groups ($'$ -groups), r is the variety of representable $'$ -groups and a is the variety of all abelian $'$ -groups. **residuated lattices* - ams** - residuated lattices elsewhere (ward and dilworth [1], §§5, 6). here we settle some questions raised by one of us (ward [1]) as to the significance of certain auxiliary conditions which a residuation may satisfy by showing in all cases that they imply that the lattice is distributive. 2. **some properties of residuated lattices** - some properties of residuated lattices radim b'elohlavek, ostrava abstract we investigate some (universal algebraic) prop-erties of residuated lattices — algebras which play the role of structures of truth values of various systems of fuzzy logic. keywords: residuated lattice, fuzzy logic, variety, congru-ence **cancellative residuated lattices - university of denver** - cancellative residuated lattices p. bahls, j. cole, n. galatos, p. jipsen, and c. tsinakis abstract. cancellative residuated lattices are natural generalizations of lattice-ordered groups ($'$ -groups). although cancellative monoids are defined by quasi-equations, the class $canrl$ of cancellative residuated lattices is a variety. we prove that ... **some properties of filters in stonean residuated lattices** - residuated lattices and stone algebras are two topics much studied in lattice theory, with impact on logic. one of the topics studied in residuated lattices is the theory of the so-called implicative ideals and filters. this paper deals with algebras that are both residuated lattices and stone algebras, the subject-matter is the detection of **non-commutative residuated lattices* - ams** - mutative residuated lattices in the vicinity of the unit element. it is found that this structure may be characterized to a large extent in terms of special types of distributive lattices (arithmetical and semi-arithmetical lattices). the next division contains a discussion of the arithmetical properties of non- **minimal varieties of residuated lattices** - vol. 52, 2004 minimal varieties of residuated lattices 219 proposition 3.1. let a be a non-identity element of a strictly simple, lower-bounded residuated lattice a , and t be a unary term such that a satisfies $t(x)=a$, for all $x \in a$, $x = een$, the variety generated by a is an atom in the subvariety lattice. **categories of residuated lattices - digitalcommons.du** - of involutive residuated lattices, and we also discuss two classes of negation-bearing residuated structures (i.e., sugihara monoids and $srdl$ -algebras) that will provide case studies for later work. in addition to providing an exposition of the theory of these algebras, chapter 2 o ers some new results about varieties of residuated **obstinate lters in residuated lattices - ssmr** - residuated lattices have an obstinate lter. also, we prove that, if f is an obstinate lter of a residuated lattice a , then f is a boolean lter and $a=f$ is the two-element chain. key words: residuated lattice, (obstinate, implicative, positive implicative, fan-tastic, quasi-primary) lter, (simple, local, quasi-local) residuated lattice, boolean
